

Vyzin Inc (VESAG) and TelemediCO Have Signed Strategic Alliance Agreement

February 2012— Vyzin Inc (VESAG), the world's leading company focusing on Mobile Healthcare and providing technological advance products to consumers to enable wellbeing of communities, and TelemediCO LLC, a Russian provider of personal services, operating in the sphere of Telehelath and Telecare, have signed a strategic alliance agreement.

It specifies basic principles of cooperation the parties will rely upon in their efforts to transfer and promote their services and products in Russia – innovative telemedical and mobile healthcare systems, wireless communication facilities and certain software to render telemedical services to people.

“This agreement will be an efficient tool to satisfy the ever growing demand for high technology individual medical care” – said CEO of TelemediCO LLC.

“ VESAG is now available in all the BRIC (Brazil, Russia, India and China) countries, which is a major milestone for our company” – said CEO of Vyzin Inc Rajendra Sadhu.

About Vyzin Inc (VESAG)

Vyzin Inc is a privately held business conglomerate with diversified interests in the fields of mobile healthcare, consumer electronics, telecommunications, information technology and manufacturing. Vyzin thrives to fulfill the needs of world communities by delivering the health and life care products for promoting a safe environment and serving to improve the safety and security of the communities.

About TelemediCO

TelemediCO LLC is a privately held Russian provider of personal services, operating in the sphere of telehelath and telecare. The company offers a comprehensive platform of innovative technologies and solutions that help patients and physicians analyze health conditions. For this purpose we supply our clients with medical devices for various monitoring needs and for certain groups of customers: from a simple patient follow-up requiring a medical test, to chronically ill and high-risk patients.
